Project Description:

In this project we made a traffic light system by using assembly language. In which following are the features as given below:

- **1. Red Light (Stop):** The initial state of the project is to show a red screen in which we used graphic properties of assembly language. The red appears and after 1 second a text "STOP" appears inside the red screen.
- **2. Countdown:** After the appearance red light and STOP text, there's a countdown displayed from 5 to 0 which take time 1 second to each count down, presumably indicating the time remaining for the next signal change.
- **3. Yellow Light (Ready):** Once the countdown reaches 0, the yellow light appears with a "Ready" text, preparing for the next phase.
- 4. Green Light (Go): Finally, the green light displays, indicating "Go," allowing the traffic to proceed.
